\*\*\* Prices for Proven Winners® plants do not include royalty/marketing fee, required tag, tag stake, or pot. See separate attached Proven Winners® list for full information on pricing \*\*\*

\* - all QT, 32, 18, and other cell tray liners will be rounded up to the nearest tray.

## A note about Pot and Tray sizes

QT	Our quarts are full quarts in 12 count trays.
18ct	Standard propagation tray - roughly 3 1/2" square
32ct	Standard 2 1/4" square propagation tray
#1	Our standard #1 is a 19cm (7.5 inch) clay colored pot with an approximate volume of 3 quarts. They are about 13% larger than a standard trade #1. Some of our plants may also be in a standard black trade #1 but we are currently phasing out those pots.
	The Proven Winners® #1 that we are currently using is a Nursery Supplies PF310S pot that is 6.25 inches across and has an approximate volume of .656 gallons. It is the size of a standard

PW1	"trade #1" As soon as the current crop is sold out we will be switching to the mandated full 1-gallon for all of our Proven Winners(R) 1-gallon plants. Expect to see our plants in these pots in mid to late 2012.
BR	Bareroot - shipped in bulk.

**Custom Growing and pre-orders**

If you do not see an item on this list that you would like us to grow, please let us know. We will be glad to talk to you about custom growing or growing for your pre-order. We are here to help meet your liner needs.

Quality Liners  
 Rooted in Tradition

**"Generic" Plants**

Branded and patented plants are all the rage these days. Our customers are always asking us what they can use instead of a branded or patented plant to save a little money. We have put together a little list of possible substitutes that we can offer. Some of these plants are every bit as good as the more expensive alternatives - some are merely passable substitutes. As we find good alternatives, we will add them to this list. Contact us to learn more about these plants.....

BRANDED PLANT	ALTERNATIVE	NOTES
Endless Summer® Hydrangea	Penny Mac	Really good substitute - arguably Penny Mac is a better plant
Hydrangea Limelight	Phantom	Similar flower and habit to Limelight - Limelight is likely a superior plant - but Phantom is a reasonable alternative.

**Weiglea Wine &  
Roses®**

**Weigela Dark  
Horse®**

Not as dark of a leaf as Wine & Roses® .  
Dark Horse® is clearly more compact and  
appears to flower better at our nursery.  
Dark Horse® is a patented plant but has no  
tag or pot requirement.

**We pride ourselves in selecting only the best plants for our growing program. While we are licensed growers for several branded and patented plant lines, we seek out and carry only the plants that grow best at our nursery (and hopefully yours!!). Sometimes the branded or patented plant is the best choice for your needs, sometimes it is not. Factors you need to consider when choosing a branded vs. "generic" plant need to include price, growth, performance, and your ability to market the plant. If your customer cares about brand, saving money on a "generic" is not going to help you sell plants. If your customer is not brand sensitive, a "generic" may provide the best value. We will do our best to provide you both alternatives so you can make the best choice for your nursery.**
